

The Junior Sculling Regatta at Dorney Lake

Sunday 5th May 2018

Promoted under British Rowing's Rules of Racing

Risk Assessment

This risk assessment is prepared in accordance with the recommendations and standards set out in the British Rowing's Row Safe: A Guide to Good Practice in Rowing ("Row Safe").

Risk Assessment Matrix

Probability of Accidents	Severity of Outcome		
	Slightly harmful (Low)	Harmful (Medium)	Extremely harmful (High)
Highly unlikely (Low)	Trivial Risk	Tolerable Risk	Moderate Risk
Unlikely (Medium)	Tolerable Risk	Moderate Risk	Substantial Risk
Likely (High)	Moderate Risk	Substantial Risk	Intolerable Risk

Risks and Actions

RISK LEVEL	ACTION AND TIMESCALE
Trivial	No action required.
Tolerable	No additional controls are required. Consideration may be given to a more effective solution or improvement.
Moderate	Efforts should be made to reduce the risk. Risk reduction measures should be implemented within a defined time period. Where the moderate risk is associated with harmful/serious consequences further assessment may be necessary to establish more precisely the likelihood of harm as a basis for determining the need for improved control measures.
Substantial	The activity should not be started until the risk has been reduced. Considerable resources may have to be allocated to reduce the risk. Where the risk involves activity already in progress, urgent action should be taken.
Intolerable	Activity should not be started or continued until the risk has been reduced. If it is not possible to reduce risk even with unlimited resources, activity has to remain prohibited.

The Junior Sculling Regatta in 2017 will be held at the purpose built Eton College Rowing Centre Dorney Lake. As it is on a lake there is no risk from passing vessels, and no risk of strong stream conditions. The Rowing Centre is professionally managed. The advice given by the staff is always followed particularly on safety matters.

LAND BASED	Probability	Severity of Outcome	Risk	Action
Occurrence	Highly Unlikely Unlikely Likely	Slightly harmful Harmful Very Harmful	Trivial Tolerable Moderate Substantial Intolerable	
Vehicle / Pedestrian / Trailer collisions.	Unlikely	Harmful	Moderate	Trailers parked in a segregated area. Car parks managed.
Minor injuries caused during rigging etc.	Likely	Slightly Harmful	Moderate	Provide close First Aid cover
Collisions between pedestrians and crews manoeuvring on land.	Likely	Slightly Harmful	Moderate	Reliance on competency of crews & coaches. The boat rigging and racking areas are clearly defined and supervised and separated from vehicle and trailer storage areas.

Promoted under British Rowing's Rules of Racing

Risk Assessment

Collisions between bicycles and pedestrians	Unlikely	Harmful	Moderate	Bicycles restricted to roads where there are no pedestrians, following a one-way system. No cycling allowed on apron, or on North side of Lake. Bank Umpires to enforce this rule.
Collisions between cyclists. Cyclists following races will proceed both ways on Island road	Possible	Slightly harmful	Moderate	Warnings in Instructions to competitors and very clear guidance provided by signs.
General trips and falls.	Unlikely	Slightly Harmful	Tolerable	Provide first Aid cover.
Fatal illness	Unlikely	Very Harmful	Substantial	First Aid present + telephone to emergency services.
Dangers from Electrical equipment, computers, generators, cabling (on ground and overhead.)	Unlikely	Harmful	Moderate	At this event, there is a minimal amount of this type of equipment. Any necessary remedial action will be taken following a site inspection the day before.
Dangers from stays supporting ropes to closed areas.	Unlikely	Harmful	Moderate	There was an incident in 2013 resulting in serious injury when truck driver disobeyed one-way instructions. Circulation has been changed to avoid repeat.
Dangers from Inclement weather – thunder & lightning.	Unlikely	Harmful	Moderate	Pedestrians warned not to stand under trees, by nearest bank umpire. No crews on water during lightning.
Fire in boathouse	Highly Unlikely	Harmful	Tolerable	Marked Fire Exits & extinguishers
Vehicle Fire	Highly Unlikely	Harmful	Tolerable	Fire extinguishers in boathouse.
Bomb warning	Highly Unlikely	Harmful	Tolerable	Evacuation of area by PA & loudhailers
Major incident (air crash)	Highly Unlikely	Extremely harmful	Moderate	Evacuation of area by PA & loudhailer.

Risk Assessment

Water Based

All boat movements on the water are covered by British Rowing's Row Safe. Row Safe applies to all participants, who are responsible for following the standards and recommendations set out therein. All coaches, marshals, umpires and officials enforce these standards and recommendations when actual or likely failure is observed. Officials have radio communication with race control.

WATER BASED	Probability	Severity of Outcome	Risk	Action
Equipment failure whilst on water.	Unlikely	Harmful	Moderate	Crews to ensure their boats comply with Rowsafe. Use lane 0 for return of crew with equipment or illness problems.
Collision between Crews Training before Racing Commences.	Unlikely	Harmful	Moderate	Circulation Pattern in place, No pre-race training permitted and no crew allowed to boat until a Safety boat is on water.
Long wait in marshalling area prior to start, giving potential for hypothermia or sun stroke	moderate	Harmful	Low	Warm up circulation pattern allows crews to keep on the move. Raft Marshals to advise crews thought to have inadequate protection for the prevailing conditions. If wait is expected to be lengthy then crews will be prevented from boating
Collisions between crews racing and crews warming up/down.	Unlikely	Harmful	Moderate	Warming up will be away from racing crews in the Return Lake. Cool down will be on main lake in lanes in final 500m, going out in lanes 8/9, returning in 2/3 (between races).
Crew member falling ill/ sustaining injury whilst still in boat.	Unlikely	Harmful	Moderate	Umpire to call for Safety boat (one of 5 present), which then conveys casualty to rafts for medical attention. Outer lanes reserved for a distressed crew still able to move unaided.
Competitor falling out of boat. Risk of drowning/hypothermia.	Unlikely	Extremely Harmful	Substantial risk	As Above
Failure of engine on powered vessel.	Likely	Slightly harmful	Trivial risk	Radio and shouted warnings given and boat paddled to nearest shore.
Wind causing "sinking" conditions. i.e. "white horses"	Unlikely	Harmful	Substantial risk	Race Committee take decision adopt alternative circulation patterns to permit racing under safe conditions. If conditions become unsafe, Race Committee will delay or abandon racing. If afloat, crews

				will be told to return to rafts by safest lane, with Safety boats in attendance.
Thunder and lightning.	Unlikely	Extremely Harmful	Intolerable risk	If closer than 6 miles (lightning /thunder gap < 30 sec.). Racing suspended. Crews off water. Resumed after 30mins of no lightning / thunder. (30/30 rule)
